

# Hi, I'm Jeremy.

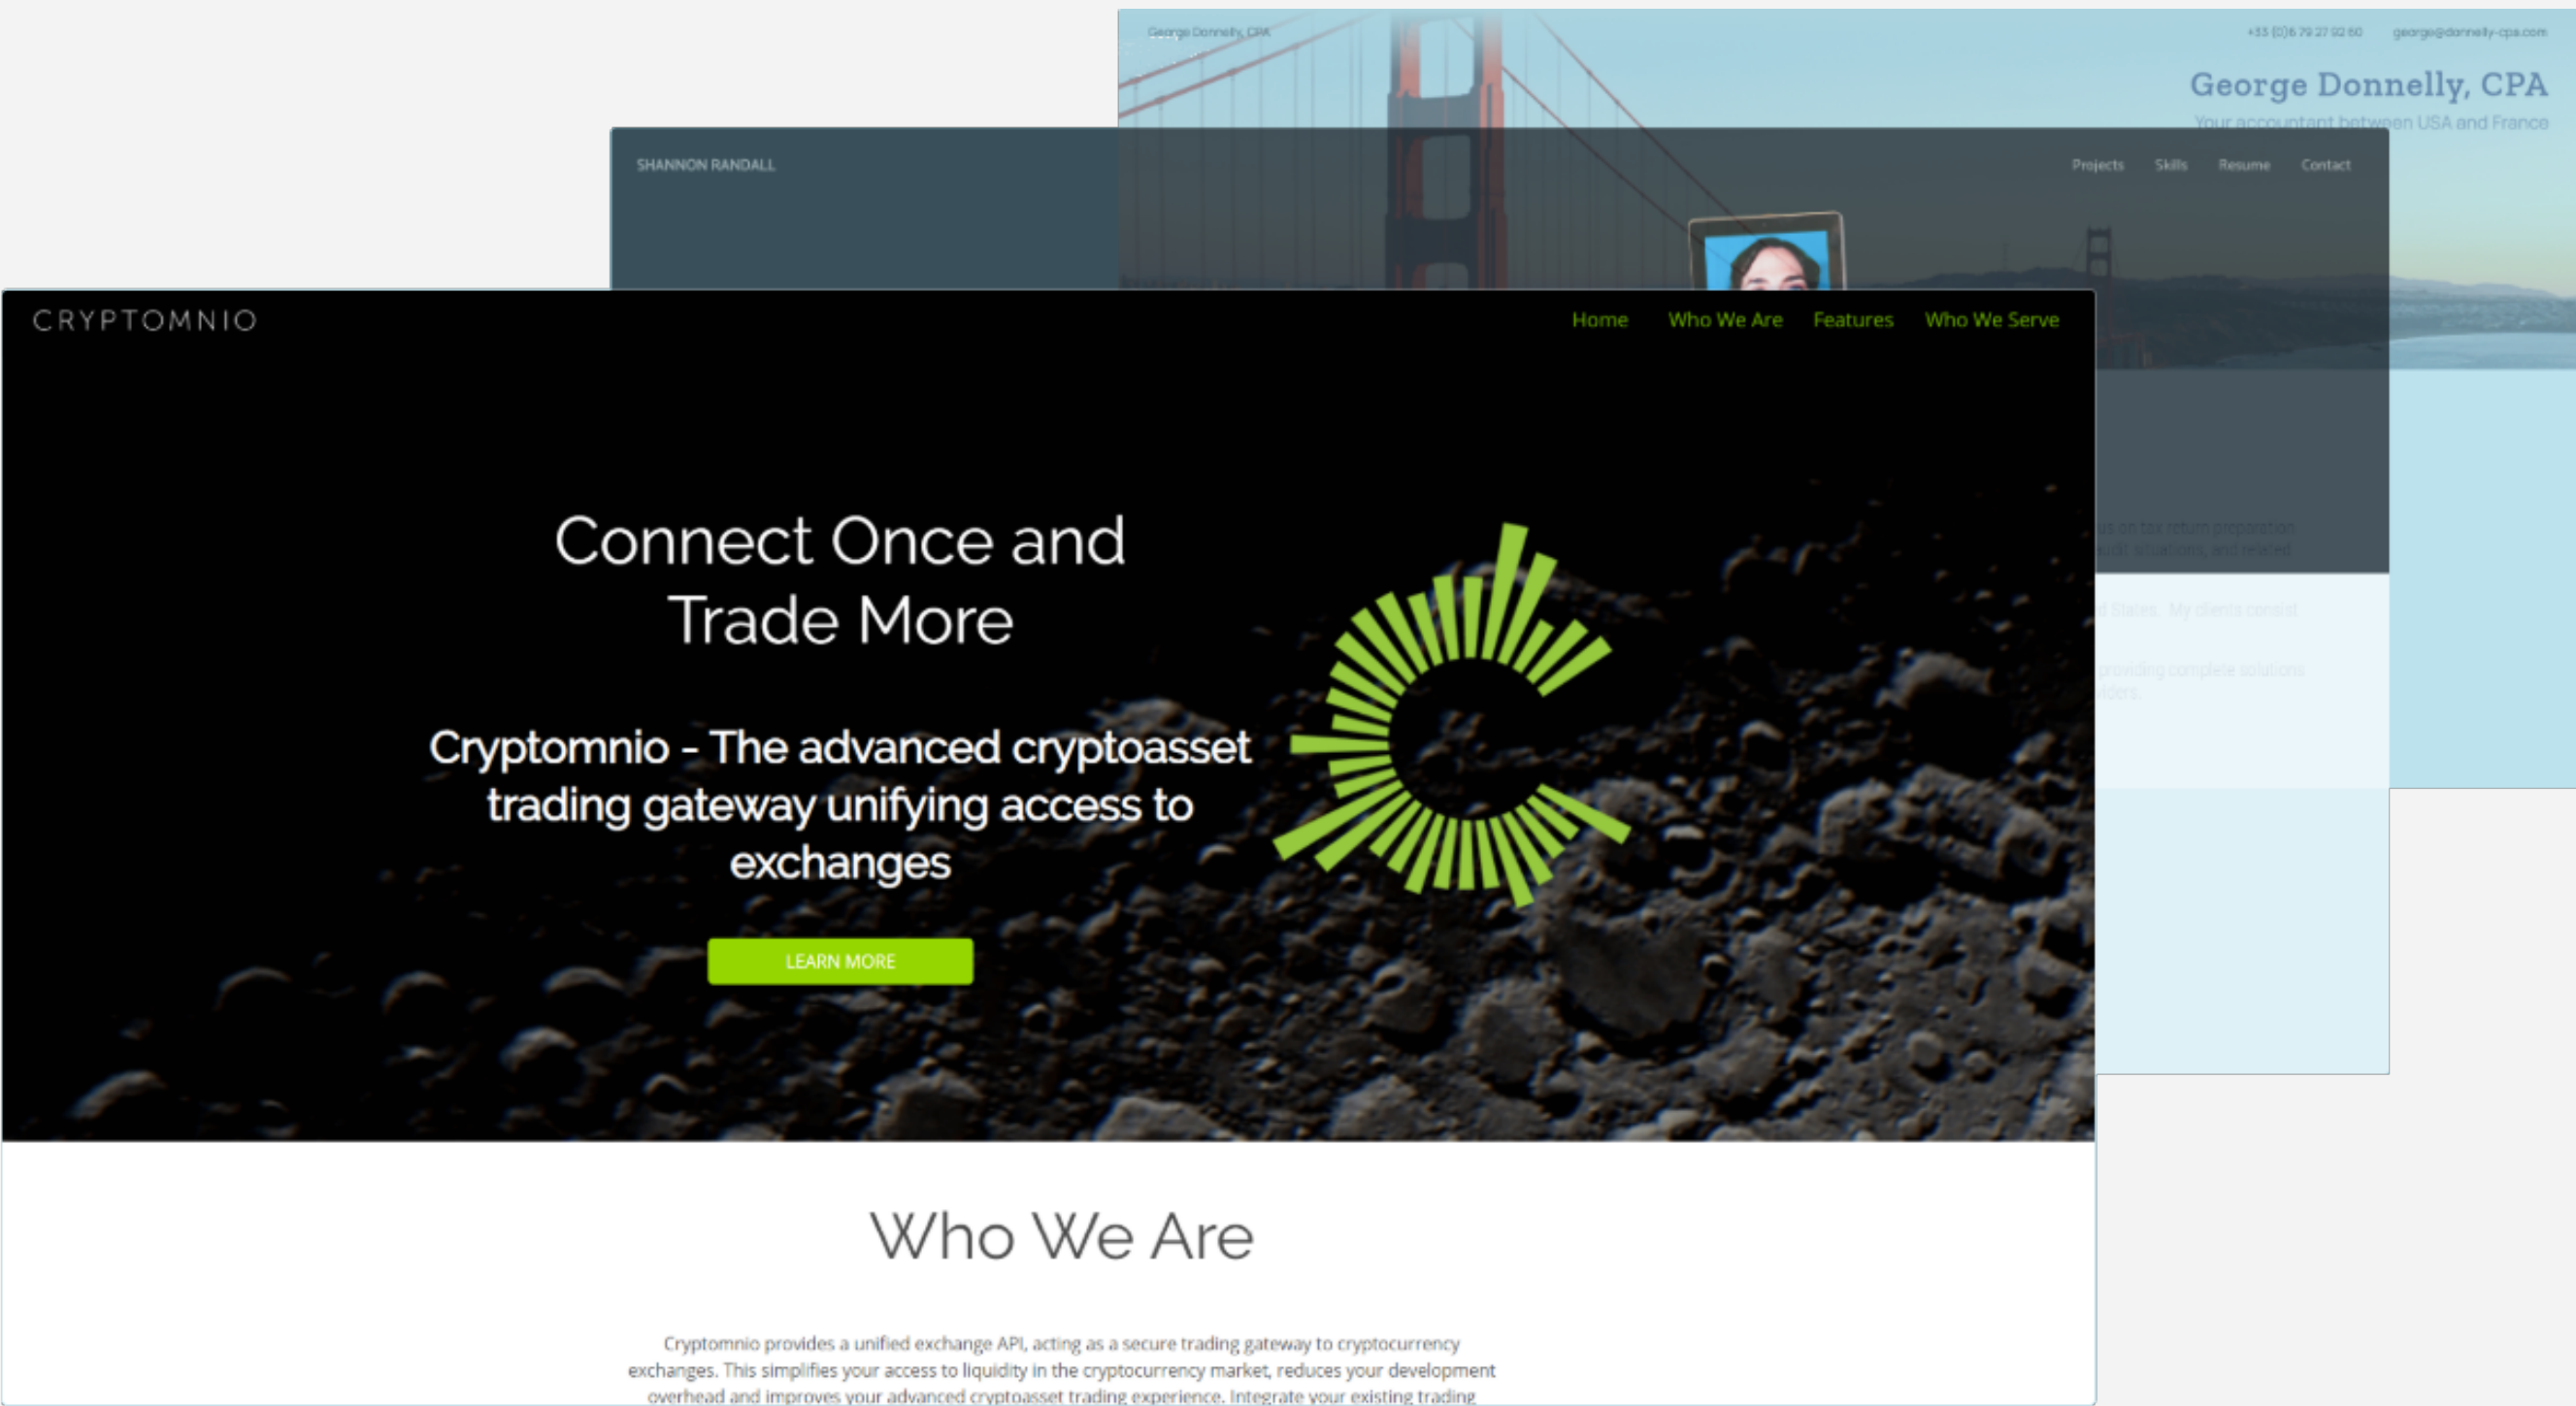

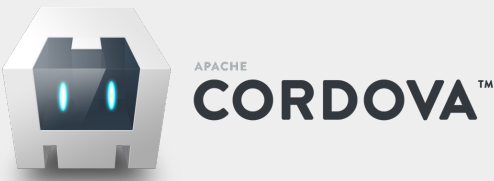

I'm a UI developer from Austin, Texas now working remotely from my home in Lyon, France. I seek out interesting problems in need of innovative solutions.

I am available for contracts ranging in length from one day to several years.

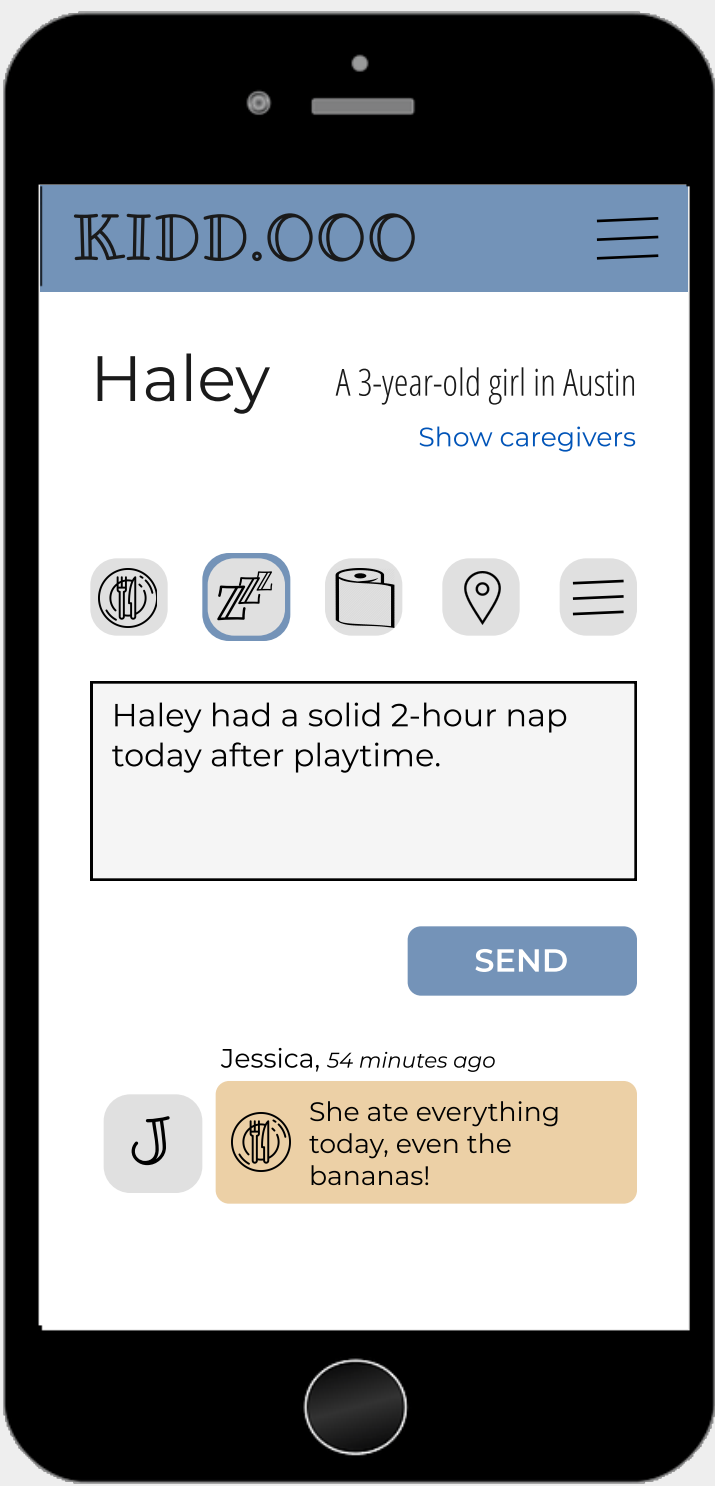

Let me know how I can help you.

My level of expertise varies between these technologies, but I've used each of them to complete personal and professional projects

I hand-crank simple websites for individuals and small businesses like ice cream: Chocolate HTML, Strawberry CSS, and Vanilla Javascript

## Kiddooo App

Keeping nannies, babysitters, parents & co-parents in the loop together, even when they're apart

Currently in development
